

Appl. No 10/664,675

Amdt. Dated

Reply to Office action of 11/18/2004

5        **Amendments to the Specification:**

      Please replace the content of the abstract of the disclosure with the following amended content:

      An electroluminescence wire core comprising a flexible central  
10    electrode, luminescent layer, and a transparent and conductive layer, the outer  
      surface of central electrode being coated with the luminescent layer and the  
      transparent and conductive layer, respectively, wherein; in the transparent and  
      conductive layer are disposed luminescent powder which is covered by  
      thermoplastic macromolecular polymer and synthetic resin.
